TUESDAY SEPTEMBER 20. 1743.

Rome, September 3.

HERE has arrived here lately Expreſs upon Expreſs from Civita Vecchia, with Advice, that on the Monday before, five or six Engliſh Ships had appeared before that Harbour, in order to demand Satisfaction for ſuffering the Spaniſh Artillery and Ammunition to be landed in an adjacent Creek, which they alledge are Contraband Goods, and therefore ought to be delivered up. We know not, as yet, what Anſwer the Governor may have given to theſe Remonſtrances, but according to the laſt Account, the Engliſh Commodore had actually given Orders for debarking his Men, and ſeem'd determined to take the Spaniſh Artillery and Ammunition, wherever he could find them, and carry them on board his Squadron. This News has put our Court into the utmoſt Confuſion. It is, indeed, no more than what ſome of our wiſeſt Politicians expected, and were therefore for obliging the Spaniards to leave our Coaſts, without landing any part of their Cargoes. If this had been done, it is very certain that we had eſcaped an Accident which muſt be attended with very diſagreeable Conſequences; for, on the one Hand, there is no Force at Civita Vecchia capable of reſiſting the Engliſh; and if, on the other Hand, we ſhould embark in this Quarrel, out of Regard to the Spaniards, very little or no Aſſiſtance can be expected from them. Time only can ſhew how far the Prudence of our Miniſtry will be able to ſupply the want of Forces, and Allies; and extricate us, with ſome kind of Honour, out of theſe puzzling Circumſtances.

Hamburg, September 20. We have certain Intelligence that 15 Ruſſian Men of War had actually joined the Swediſh Fleet off Carelſcroon, and were to cruize in Conjunction with them, as long as the Seaſon would permit them. Expreſſes paſs daily to and from Copenhagen, from whence we conjecture, that Things cannot long remain in their preſent uncertain Situation; but that the Daniſh Fleet will either immediately ſail, or that Teſſin's Negotiation put an End to the Diſputes between the two Crowns; which would be an Event extremely agreeable, not only to the Intereſt of the two Nations, but to all their Neighbours. In the mean time, it is not eaſy to expreſs how great a Character the Duke of Holſtein-Eutin has acquired here. He is certainly the greateſt Prince in the World that beſt deſerves to wear the Crown; for with all the Abilities neceſſary to ſo exalted a Station, he has all the Humanity, all the Affability, which is requiſite to procure, and to keep, the Affections of a People.

Journal of Prince Charles's *Army continued.*

On the 9th we entirely finiſhed the Head of our Bridge in the Iſland of Rhinmarck, where, in the laſt Century, ſtood the New Town of St. Lewis, which was demoliſh'd by Virtue of the Treaty of Ryſwick. We furniſhed it immediately with a great Number of Cannon, and left over a ſufficient Body of Troops to defend it. While we were thus employed, the Enemy raiſed two new Batteries, upon which they mounted eight Pieces of Cannon.

On the 10th, about Noon, they began to fire upon our Retrenchments, and upon the Head of the Bridge. But their Fire of theirs, though it was very briſk, had no great Effect; whereas the Batteries from the Head of the Bridge, and from the Eggersberg, play'd ſo ſucceſsfully, that moſt of the Enemy's Cannon was diſmounted.

On the 11th, in the Morning, we perceived that our Loſs was ſtill greater than we imagin'd; for notwithſtanding the Enemy had wrought hard all Night, yet, for all their Diligence, they had not been able to remount above two Pieces of Cannon upon each Battery. The Forces are in high Spirits, and as eager to come to Blows with the French, as can be deſired. Prince Charles and Count Khevenhuller perſiſt in their Deſign of paſſing this River, and doubt not of effecting it in three or four Days time.

IRELAND.

Dublin, September 10. On Tueſday laſt the Rev. Dean Curtin, was Inſtall'd, in St. Patrick's Church, Precentor Gilhader, in the room of the Rev. Mr. Synge, now Archdeacon of Dublin.

Laſt Week a Boat, with 11 Men in her, put into Gallway, but was obliged to go off again to perform Quarantine, fearing they belong'd to ſome Ship from an infected Place. Next Day they made it appear, by their Papers, that they belonged to a Ship bound from London to Carolina, and that ſhe had foundered at Sea 200 Leagues from thence, and the Men were all in good Health.

Extract of a Letter from Kinſale, Septembr 2, 1743.

'Laſt Wedneſday arrived here the Ship, King of Denmark, from Copenhagen, 900 Tons, 30 Guns, and 150 Men, bound to China: She has been 8 Weeks abroad, and made the Brazilles, but forced back by contrary Winds and bad Weather. She had been on our Weſtern Coaſt near Dingle, and the Blaſquetts, for 8 or 10 Days, and detain'd there by Eaſterly Winds before her Arrival here. Her Appearance on that Coaſt made great Noiſe in this Country, fearing ſhe had come from Places infected; but the Captain and Crew are very Healthy.'

COUNTRY NEWS.

Briſtol, September 17. On Monday laſt Mr. Lydiard, a Barber in Broadmead, was unhappily kill'd by a Kick of a Horſe in his Breaſt. It ſeems he and his Wife, with other Company, were going to Bath to a Wedding; but the Saddle of one of the Horſes not ſitting eaſy, they alighted, in order to ſhift it; and as Mr. Lydiard was ſtanding a little behind one of the Horſes, the unfortunate Creature threw up his hinder Legs, and kill'd him on the Spot.

And the Beginning of this Week Mr. Parſons, an eminent Carpenter in the Old-Market, was kill'd by a Fall from a Horſe, after being at the Horſe Races on Clarken-Down, near Bath.

And alſo the Beginning of this Week, a Man at a Houſe in Bedminſter, throwing a Knife at a Dog, unhappily pitch'd it in the Skull of his Wife's Brother, who was ſitting by, of which he died in a ſmall Time—— But before he died, he begg'd that nothing might be done unto his Brother-in-Law, inaſmuch as he ſaid, that he believed he did not intend any Evil againſt him.

Thurſday laſt John Berrew, Eſq; was elected Mayor of this City for the Year enſuing; as were alſo Iſaac Elton, and John Durbin, Eſqrs; Sheriffs.

Wedneſday next our new Exchange will be open'd with a grand Ceremony ſuitable to the Occaſion. The following is an Extract from an intended Poe m on that Subject, addreſs'd to Sir Abraham Elton, Bart. Mayor; and the Corporation.

See, ſee, at length the finiſh'd Structure riſe;
A Structure that with (*a*) Greſham's Labours vies!
A ſtately Pile, by publick Spirit plann'd,
Politely finiſh'd——regularly grand!
With ſtriking Beauties how it charms our Eyes;
A Roman Structure gracing Britiſh Skies!
Each Beauty's blended in the fine Deſign,
Such Art, Palladio—and ſuch—Jones—was thine;
And ſuch is Woods—who rear'd this ſpacious Dome,
A finiſh'd Wonder for each Age to come!
Methinks I ſee the Sculptor's Art all all ſhown,
The mimick (*b*) Statue——and the breathing Stone;
Our figur'd King within the Area plac'd,
His Head with never-faiding Laurels grac'd:
Serene——as when he late his Path purſu'd
Thro' Scenes of Slaughter—and thro' Seas of Blood;
When Gallia (*c*) ſhudder'd at his dread Alarms,
Her Golden (*d*) Lillies fading at his Arms.
The rich Relief to future Times ſhall tell——
How Britain triumph'd——and how Gallia fell!
Expreſs in ſpeaking Stone our Cannon's Sound,
And Dunkirk's Forts low-levell'd with the Ground;
Diſplay the diff'rent Force of Steel and Gold;
A George recov'ring what a Charles hid ſold.
——Yon vacant Niche ſhall (*e*) William's Figure own,
And all the Father ſhine in all the Son.

Norwich, September 17. Laſt Thurſday, about Two o'Clock in the Afternoon, William Lake, a Felon under Sentence of Tranſportation, for robbing Mr. Morrice, broke out of the City Jail, and made his Eſcape; who had, before, cut his Irons off, and two large Bars, and a croſs Iron in the Grate next the Street. Tice, who was condemn'd to be hang'd, but repriev'd till further Orders, and Hook, who was caſt for Tranſportation, for robbing Mr. St. John, had both ſaw'd off their Irons, in order to eſcape with Lake, but were prevented.

LONDON.

The Lark, Rawlinſon, from Antigua to Liverpool, founder'd at Sea; the Crew were taken up by a Frenchman, who afterwards put 'em on board the Lion Man of War, for Jamica, who has brought 'em to Plymouth.

Capt. Ralph Marſhal of the Anne, juſt arriv'd from Jamaica, met with his Majeſty's Ship the Adventure, John Draper, Eſq; Commander, and the Bonetta Sloop, the 2d of July, off of the Weſt End of Hiſpaniola, going off of their Cruize to Jamaica, with a French Ship, which they hoped to make a good Prize; having likewiſe ſent one into Jamaica a few Days before. Captain Draper gave Capt. Marſhal the following Account; viz. May the 20th, at Two o'Clock in the Afternoon, we ſaw a large Ship off the Eaſt End of the Iſland of Jortuga, gave her Chace at Five, and fired ſeveral Shot at her, in order to bring her too. She ſhewed French Colours. We ſtill firing at her, ſhe returned our Fire, and at Day-break run herſelf on Shore, about a Mile and half from Port Pie, on Hiſpaniola. She was the Ship called the Archangel of St. Malo, Barthelomew Louvel, Maſter, bound to the Port of Loniſianne. June 7. We engag'd a large Ship under French Colours off of Cape Francois, from Day-break till One o'Clock in the Afternoon; ſhe being very much damaged, ten or twelve Boats came to her Aſſiſtance, and tow'd her into the ſaid Cape; ſhe being ſo near the Shore, and ſo little Wind, we could not come up with her. We have been ſince inform'd, that ſhe is the Minerva of Provincha, from Cadiz, bound to Vera Cruz.

As Capt. Marſhal had miſſed the Lion Man of War, who was the Convoy, Capt. Draper was ſo kind as to order

order the Commander of the Bonetta Sloop to convoy him as far as Crooked Island.

Mr. Alderman Ladbrook, one of the Sheriffs elect, has appointed Mr. Hill, Clerk to the Grocers Company, to be his Under-Sheriff for the Year enſuing.

His Majeſty is expected at his Palace at St. James's by the 25th of next Month, the neceſſary Preparations being making for his Reception.

His Grace the Duke of Somerſet, who has been dangerouſly ill at his Houſe at Charing-Croſs, is in a fair Way of Recovery.

Yeſterday the Lady of ——— Ayres, of Derbyſhire, Eſq; lay dangerouſly ill at his Houſe in Cork-ſtreet, Burlington-Gardens.

Laſt Sunday died, at his Houſe near Carnaby Market, Mr. Baker, many Years Chief Box Keeper at Drury-Lane Playhouſe. He was a Perſon well reſpected for his courteous Behaviour to all Perſons.

Laſt Saturday Night a Marſhalſea Court Officer was attack'd by three Foot-pads near Groſvenor Square, and robb'd of about 19 l. which he had juſt receiv'd. He making a ſtout Reſiſtance, the Rogues beat him in a cruel manner, and then made off.

THE Elements of ALGEBRA, in a New and Eaſy Method; with their Uſe and Application, in the Solution of a great Variety of Arithmetical and Geometrical Queſtions, by General and Univerſal Rules.

To which is prefix'd, An Introduction containing a ſuccinct Hiſtory of this Science.

By *Mr.* NATHANIEL HAMMOND, *of the* Bank.

Extract from the Account of this Book in the Works of the Learned.

'The World has long complained of the Want of a proper Introduction to Algebra. Some are ſo very conciſe, as if they were contrived not to teach but introduce a Teacher; others again are large, but wrote with ſo little Condeſcention to the Underſtandings of ſuch as are altogether unacquainted with the Science, that they are of very little Uſe to thoſe who are moſt inclined to make uſe of them. Whence it comes to paſs, that few find it practicable to make any Progreſs in Algebra without a Maſter, tho' certainly the Science in itſelf is far from ſurpaſſing a clear Head, and a tolerable Underſtanding.

'The Deſign of this Treatiſe, which is of a reaſonable Bulk, and which contains nothing which is not ſolid, and to the Purpoſe, is to aſſiſt ſuch as are engaged in teaching Algebra with a regular Method, and a large Stock of Examples; ſo that their Scholars may find Employment in their Abſence; and to enable ſuch as live in Country-Places, and muſt conſequently want all other Tutors, except Books, to acquire ſuch a Skill in this Science, as may enable them to ſpend a Portion of their Time agreeably in the Cultivation of their better Parts, and in rendering a natural Method of enquiring after Truth habitual.

'The Treatiſe begins with a copious Explication of the Fundamental Principles of the Art, and of the Signs and Method of Notation uſed therein. The Author then proceeds to the ſeveral Rules, explaining them carefully and copiouſly in all their various Caſes; ſo that with a moderate Attention it is ſimply impoſſible for a Perſon, who deſires to be Maſter of Algebra, to miſs of his End.

'We never find this Writer advancing any thing out of its proper Place, or burthening the Mind of his Scholar with Rules, before they become neceſſary: He profeſſes to have imitated the judicious *Euclid* in this Reſpect; and he has done it with equal Art and Felicity. By this means he has delivered the young Student in Algebra from that which is uſually the moſt fatiguing Part of the Science, viz. The Doctrine of Surds, in the Manner in which it is uſually taught. By the ſame Means he leads his Reader directly to Equations; and, by ſhewing him the Profit he will reap from this Science, encourages him to overcome all its Difficulties. But having thus laid a ſtrong and rational Foundation, he moves more ſlowly through the reſt of his Work, that whoever follows him, may be obliged to become Maſter of every Branch of the Art, ſo as to be a compleat Algebraiſt, before he quits his Book, and not a Smatterer.

'Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the incomparable *Newton*, are here ſo clearly explained, and their ſeveral Caſes ſo plainly ſet down, and ſo thoroughly explicated, that it may be truly ſaid, there are no where elſe ſuch Inſtructions to be met with. At the Cloſe of the Book, we find abundance of Obſervations, neceſſary for enlightening ſuch Minds as are willing to proceed ſtill farther in analytic Diſcoveries; ſo that conſidering the Compaſs of this Work, and that too is very moderate, it is as complete as poſſibly can be expected: And he who is thoroughly verſed in it, will find no great Difficulties, when he proceeds to ſublimer Studies. The Language is plain and natural, the Book is more copious than any other in Examples, and the Illuſtrations of them are ſo full and clear, that it is impoſſible to miſtake their Meaning.'

Concerning Gleets *and* Seminal Weakneſſes *of all Kinds.*

ALL judicious Phyſicians and Surgeons allow, that nothing is more difficult to cure than Stubborn Gleets and Seminal Weakneſſes, whether occaſion'd by too ſevere purging for Venereal Injuries, violent Strains, Pollutio ſui, or any other Cauſe whatever; and that they are dangerous in their Conſequences, as well as difficult to cure, is as certain, ſince they exceedingly weaken the Generative Faculties, infeeble the whole Nervous Syſtem, often bring on Hectick Heats, a Tabes Dorſalis, or Conſumption of the Back, or an Atrophy or Nervous Conſumption, which frequently terminate in Death itſelf.

All ſuch, therefore, who have the Misfortune to be troubled with Old or Stubborn Gleets, Seminal Effuſions, Involuntary Emiſſions, exceſſive Nocturnal Pollutions, or any Weakneſs of the Kidneys, Ureters, or Bladder, the Diabetis, or Incontinency of Urine, or Difficulty of holding their Water, would doubtleſs be glad to meet with a certain, ſafe, and ſpeedy Cure, which they moſt aſſuredly may, by taking only a ſmall Quantity of a tranſcendent BALSAMICK RESTRICTIVE ELECTUARY, now publiſhed for a general Good, after having for many Years been experienc'd never once to fail perfectly curing the moſt Stubborn Gleets known, in a few Days, without Difficulty or Trouble; as alſo all other Weakneſſes of the Back, Reins, Seminal Veſſels, and Urinary Paſſages, whichit almoſt inſtantly cures, bringing to rights and reſtoring all thoſe Parts and Paſſages to their natural Tone and priſtine Vigour, in a very extraordinary Manner, and by taking a few Doſes of it only.

This tranſcendent BALSAMICK RESTRICTIVE ELECTUARY is neither diſagreeable to take, nor occaſions the leaſt Diſorder, but is a wonderful Reſtorative in all Weakneſs and Decay of Conſtitution of any Kind, and particularly ſtrengthens the Back, Reins, Seminal and Urinary Veſſels to an immenſe Degree, inſomuch that in any Debility of them, one Doſe of it does more than ten of any other Remedy yet found out; and all Perſons fatigu'd with Gleets or Seminal Weakneſſes of any Sort, or Weakneſſes of the Urinary Veſſels, who take it, will in three Days time find it ſo very effectual, that they will be moſt agreeably ſurpriſed at it.

When a Medicine will infallibly accompliſh ſuch a ſafe, ſpeedy and perfect Cure of ſuch difficult Maladies, as Gleets and Seminal Weakneſſes are, as this Great Remedy truly and directly will, even after all other Means and Medicines have been tried in vain; too much cannot be ſaid in it, and this All who ever took it for any of the above-mention'd Purpoſes, have readily declared.

The Price is but 6 s. a Pot, altho' for its abſolute Efficacy, one Pot alone being ſufficient in moſt Caſes to accompliſh a Cure, worth ten times as much, and by the Author's ſpecial Appointment, is to be had only at Mr. Radford's Toy-ſhop, at the Roſe and Crown againſt St. Clement's Church-Yard in the Strand, ready ſealed up, with a Book of Inſtructions, which whomſoever carefully reads will perfectly know, when the Gleet or Weakneſs he is afflicted with ſucceeds a Venereal Injury, whether all the Malignity of the Foul Diſeaſe is intirely eradicated or not.

Note, Ask only for a 6 s. Pot of Baliamick Electuary.

The Univerſal Family MEDICINE,

Still more and more fam'd, after upwards of 20 Years Succeſs with the Publick,

Is ſold by the Author's Appointment, by Mr. King, Printſeller in the Poultry, near the Royal Exchange; by Mr. Horn, at the Sign of the Duke of Cumberland, in Cranbourn Alley near Leiceſter Fields; and by Mr. Hildyard, Bookſeller at York; at 3 s. the Bottle Retail.

It is to be taken at any Seaſon of the Year, and is very agreeable to Young and Old, that Children take it without Trouble, a few Drops being a Doſe; and ſo gentle, that it weakens not the moſt Aged: It is is a ſafe and effectual Alterative, to be taken in a leſs Doſe than where Purging is neceſſary; as is the excellence inherent in this Medicine, which is a known Property well known to the Learned, to be in ſome Cathartick Medicines.

It is in particular,

A Certain and infallible Cure for the SCURVY, tho' of the longeſt Standing, and attended with the moſt aggravated Circumſtances (a Diſtemper ſo common to Engliſh People, that not one in a thouſand is wholly exempt from it, and great Numbers are ſorely afflicted with it) being a cordial Elixir, peculiarly adapted to that Diſeaſe in all its Forms of appearing, from the ſlighteſt itching Humour in the Blood, to its utmoſt or laſt Efforts on human Nature.

For it is a true Specifick Cordial, that perfectly cures the Diſtemper by gentle Evacuation, by Stool and Urine, the only ſure and effectual Way perfectly to cure the Scurvy, and prevent Relapſes (notwithſtanding what may be dreamt to the contrary) the Truth of which is witneſſed to daily, by many Thouſands that have taken this Medicine. It ſo perfectly rectifies the Blood and Juices, that ſcrophulous Cafes are alſo ſpeedily cured by it; and all Spots, Blotches, Pimples, &c. on the Skin, are quickly and entirely taken off, the Patients made lively and briſk, many chronick Diſeaſes prevented, and a due State of Health ſecured.

It removes all Pain in the Stomach, helps Digeſtion, opens Obſtructions, and is peculiarly ſerviceable to Maids declined to, or troubled with the Green Sickneſs. 'Tis the beſt Medicine in the World to deſtroy Worms in Children or grown People, and prevent their Return; for it ſcours away all the ropy, viſcid Humours which breed them in their Bowels, and is ſo well adapted to all Conſtitutions, that it is deſervedly eſteemed both in City and Country, the moſt general Family Medicine that ever was known to preſerve Health, and hinders no Buſineſs or Recreation.

Good Allowance is given Wholeſale by Mr. King for ready Money to Country Shopkeepers, &c. to ſell again. This Medicine will keep many Years in any Climate.

The Directions given with it are large and full.
